Education

Delhi Technological University (Formerly DCE) Bachelor of Technology 2022-2026	8.3 CGPA
SAM International School Class XII 2022	92.6%
SAM International School Class X 2020	95.6%

Technical Skills

Programming Tools : Python, Pandas, NumPy, Matplotlib, MySQL, EXCEL, Seaborn, Beautifulsoup

Analytics Tools: PowerBI, TABLEAU, PowerQuery, Excel Dashboard, MixPanel, GA4, API Integration

Business & Strategy : Market Research, KPI Tracking, Data Analysis , Decision Analytics, Public Speaking, Cross functional Collaboartion, POSTMAN

EXPERIENCE

Collegedunia | Associate Product Manager (APM) |

December 2025 - Present

- Owned analytics, automation, and day-to-day management of the in-house CRM and LMS, building KPI dashboards using GA4, Power BI, Excel, and Google Sheets to track user engagement, lead conversion, retention, and platform performance. Implemented and analysed GA4 to track user behaviour, engagement metrics (sessions, active users, event counts), and funnel drop-offs across LMS modules.
- Implemented and analyzed GA4 event tracking across LMS modules, identifying user journey bottlenecks and funnel drop-offs to support data-driven product improvements and feature prioritization.
- Automated SMS campaign workflows through Python scripts and API integrations, significantly reducing manual effort and improving campaign execution efficiency.
- Utilized Python (Pandas, NumPy) for data cleaning, exploratory analysis, and automated reporting, enabling faster decision-making for product and business stakeholders.
- Developed dashboards and reports to monitor key product metrics including user activity, lead generation, conversion rates, engagement trends, and operational KPIs.

Product Management Intern | Atisunya Private Ltd | [Link](#)

June 2025 – July 2025

- Conducted **market research and competitor analysis** to identify customer pain points and product gaps across AI-driven solutions.
- Assisted in **product roadmap planning and feature prioritization** using customer feedback and data-driven insights and forming PRDs for the team.p
- Utilized tools like **Excel, Python, Mixpanel and Power BI** for project tracking, data visualization, and requirement documentation.

Data Analyst | Labmentix | [Link](#)

January 2025 – March 2025

- Developed interactive dashboards using Power BI, Tableau, and Matplotlib to visualize **key business KPIs**, improve decision-making efficiency, and highlight **critical data insights**—reducing team workload significantly. Automated weekly reporting workflows, and datasets **reducing manual effort by 30%** .
- Delivered **data-driven insights** to stakeholders through presentations and reports, leading to a **20% improvement in decision-making speed** and alignment across cross-functional teams.

Research Intern | SIEMENS | [Link](#)

June 2024 – July 2024

- Collaborated with cross-functional teams across R&D, automation, and digitalization initiatives, contributing to a **25% increase in process efficiency**.
- Assist in **collecting, cleaning, and analysing data** to derive meaningful insights that contribute to the **innovation pipeline**.

Personal Projects

Banking Domain Analysis | PowerBI, ML, Matplotlib, Seaborn, Pandas, MySql | [Link](#)

June 2025

- Delivered insights that supported targeted customer engagement strategies, leading to a **12% increase in cross-sell campaigns**. Optimized data workflows reducing manual processing time by 40% and supported fraud detection initiatives improving risk assessment by 15%.
- Performed **EDA and customer segmentation analysis** to identify trends in engagement, risk profiles, and product usage.
