

SANSKAR MAURYA

PRODUCT MANAGER

New Delhi, India | +91 9654643743 | sanskarmaurya007@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Product Manager who leads products end to end — from discovery and user research through PRDs, prioritization, and feature launch — with a track record of shipping enterprise-grade, AI-driven solutions. Combines a strong technical and analytics foundation (SQL, Python, GA4, Mixpanel) with product scoping, UX aptitude, and the storytelling and stakeholder management to align product, engineering, and design around a clear North Star metric. Turns behavioural and funnel data into prioritized roadmaps and experiments that lift conversion and retention. DTU graduate drawn to high-consideration marketplace and enterprise AI products.

SKILLS

Product: Product Strategy & Roadmapping, Product Discovery, User Research, PRD/BRD Authoring, User Stories & Acceptance Criteria, Backlog Grooming & Prioritization, MVP Scoping, Sprint Planning, Feature Launch & Release Management, OKRs & North Star Metrics, Experiment Design, Go-to-Market

Analytics: SQL (MySQL), Python (Pandas, NumPy), GA4, Mixpanel, Product Analytics, KPI Definition & Tracking, Funnel & User-Journey Analysis, Cohort & Retention Analysis, A/B Testing & Experimentation

Tools: Jira, Confluence, Figma, Notion, Power BI, Tableau, Excel / Google Sheets, Postman

PROFESSIONAL EXPERIENCE

Associate Product Manager — Collegedunia

Dec 2025 – Present

- Led end-to-end delivery of CRM and LMS enhancements — running product discovery, defining requirements, authoring PRDs, writing user stories with acceptance criteria, and grooming and prioritizing the backlog with engineering to improve conversion across key user journeys.
- Own the North Star and supporting KPIs (engagement, conversion, retention), using GA4 event analysis to isolate funnel drop-offs and quantify the impact of each fix — reducing drop-off by ~18% and lifting conversion by ~12% on prioritized journeys.
- Designed and analyzed A/B experiments and ran cohort and retention analysis, writing SQL to validate hypotheses and segment users, and turning findings into prioritized, data-backed product decisions.
- Built single-source-of-truth dashboards (Power BI, GA4, Sheets) and led stakeholder discussions to align on roadmap priorities; automated SMS workflows via Python and APIs, reducing manual effort by ~45%.

Product Management Intern — Atisunya Pvt. Ltd.

Jun 2025 – Jul 2025

- Drove product discovery for enterprise-grade, AI-driven solutions, analyzing Mixpanel and Power BI usage to surface user pain points, UX and feature gaps, and MVP opportunities.
- Conducted market and competitor research, authored PRDs, and prioritized MVP features with engineering and design to translate insights into build-ready requirements.

Data Analyst — Labmentix

Jan 2025 – Mar 2025

- Built interactive dashboards in Power BI, Tableau, and Matplotlib to track business KPIs and surface critical trends.
- Automated weekly reporting workflows and datasets, reducing manual reporting effort by 30%.
- Delivered analysis through compelling stakeholder presentations, improving decision-making speed by 20%.

Research Intern — Siemens

Jun 2024 – Jul 2024

- Collected, cleaned, and analyzed operational data with R&D, automation, and digitalization teams to feed the innovation pipeline.
- Contributed to a 25% increase in process efficiency through data-driven recommendations.

KEY PROJECT

Textify & WhatsAppify — Unified Customer Communication Platform (SMS & WhatsApp Automation)

- Owned the full product lifecycle for two in-house messaging products — conducting stakeholder discussions, identifying messaging workflow pain points, authoring PRDs, and prioritizing MVP features before implementation.
- Consolidated customer communication into one enterprise-grade platform, removing reliance on third-party vendors; defined success metrics and tracked send volume, delivery, and engagement.
- Reached 10,000+ customers per campaign and cut manual send time by ~70%; reduced external messaging and vendor costs by ~40% and lifted engagement and response rates by ~35% versus email-only outreach.
- Scaled support to 500+ conversations/day with response time down from hours to minutes, delivered through Python and API integrations.

EDUCATION

- Delhi Technological University (formerly DCE)** — B.Tech, CGPA 8.3/10 | 2022 – 2026 (Graduated)
- SAM International School** — Class XII 92.6%, Class X 95.6% | 2020 – 2022
